Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takahara (US6219113).

Takahara discloses a method of cutting off (employing laser) the TFT and the pixel electrode from each other for purpose of changing a white point pixel defect to a black point pixel (col. 71, lines 60-64).

Cutting off the TFT and the pixel electrode from each other (obviously) implies that the pixel electrode is cut in the vicinity of the contact (i.e. source or drain electrode) connecting an electrode of the TFT to pixel electrode.

Per claims 4 and 8, it would have been at least obvious to one of ordinary skill in the art to comprise a separation/cut between the TFT and the pixel electrode such that the display can be best optimized.

Art Unit: 2871

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
